

x2uk.com

Introduction

At X2 (UK), we operate a nationwide network of transport partners and run a fleet to provide a flexible and scalable solution tailored to customer-specific needs, across the UK and Europe.

We provide anything from single-load deliveries to comprehensive logistics management and can mobilise a fleet of vehicles the same day as we receive an enquiry if needed.

As a fully independent business owned by its management, we are big enough to cope but small enough to care.

UTILISE

Asset-Light Logistics

Equipment Types

Either through our core fleet operations or by utilising our extensive 4PL partner network we can provide the following range of equipment types to service your needs:

- 44 Tonne Artics
- Standard & Mega Curtainside Trailers
- Box Trailers
- Double Deck Trailers
- Container Skillies
- Tail-Lift Trailers
- Fridge Trailers
- Moffets, Flatbeds & Hiabs
- 18 Tonne Rigids, 7.5 Tonne Rigids
- Sprinter Vans & Luton Vans
- Low Loaders

Benefits of 4PL

- **Improve efficiency while reducing transport costs**
 - Minimises the need for heavy capital investment in infrastructure, such as investing solely in a fleet and depreciating logistics assets.
 - Conversion of large, upfront expenses into manageable operational costs that have no vehicle tie in fees or stand down costs.
 - Utilises return journeys which in turn reduces empty running miles, increases efficiency and reduces costs by removing the need for additional vehicles to be placed on the road.
- **Reduce carbon emissions by optimising transport routes**
 - Able to identify complimentary return journeys which can reduce carbon emissions by up to 25%.
- **Scale transport as easily as flicking a switch**
 - Easily scale resource up during peak periods and back down during quieter periods - avoiding lengthy lease agreements and sunk costs.
 - Allows for more focus to be placed on strategic areas of your business operations over management of day-to-day tasks.
- **Turn an extensive partner network into a single point of contact**
 - Remove the need to manage multiple haulier relationships.
 - Consolidate invoice payments into one.
 - Simplify delivery processes and reduce workload.
